Market Commentary

by **Per Amundsen, Head of Research**

At its July meeting the RBA Board following a clear bias for further easing expressed in late June cut the Cash Rate by 0.25% to a new record low of 1.00% and Governor Lowe re-affirmed the prospect of further easing if needed tied to employment. The US Fed made no change to rates at their June meeting but Chairman Powell's remarks appeared to signal the possibility of a cut by the end of the year. AUD/USD have remained just below \$0.70 with markets still pricing in further cuts to rates by both the RBA and the FOMC. There have been several changes in our ratings and trends this month. Melbourne and Sydney Residential have moved to Fair for houses and the trend has remained Stable. Units have stayed Fair in both cities and also moved to Stable trends. Industrial ratings in both cities have been upgraded to Strong making four markets rated as Strong and Improving with all in Sydney and Melbourne. The News and Views section of our Monthly Market Focus discusses the impact of the shift to a continuation of lower interest rates that we have experienced over the past few months and our Quarterly Update available from mid-July provides further detail on the economy and the property sectors we cover.

Market Commentary

by **Lauren Ryan, Investor Relations**

Over the last 11 months we have seen some volatility in the Bank Bill Swap Rate, mostly in a downward direction. In the last 6 months of 2018 the out of cycle change in the Bank Bill Swap Rate was somewhat influenced by the upward movement in US Federal Reserve monetary policy. From February 2019 however there was a lot of commentary from renowned economists & RBA watchers that official cash rate cuts were imminent. Some argued the Federal Election in May might halt any such rate cuts, nevertheless we saw the Bank Bill Swap Rate tracking consistently down in line with that expectation. In the last two months we have seen two consecutive rate 0.25% reductions leaving the cash rate at 1%, with the Bank Bill Swap Rate largely reflecting the RBA's move and directly impacting associated investment returns including those in our own funds. Investors continue to seek meaningful yield in this low interest rate market while maintaining a strong focus on capital preservation. Thinktank's Income Trust returned 5% p.a. in the month of June.
